Subject Index

Acid amides, complexes with aprotic solvents, EGA 199
Acrylates, of transition metals, thermal decomposition 233
Activation energy, of copper(II) aquacomplexes 97
– –, of degradation of binary polymer systems 25, 33
– –, of thermal decomposition of acrylates and polyacrylates 243
Adhesive films, thermodiffusive characteristic of 65
Adsorption complex of dibenzotropone with montmorillonite, conformation of 49
– istoherms of water vapour, on mixed hexacyanoferrates(II) 271
Aluminium, anodizing of, in sulfuric acid, thermal phenomena 263
– -zinc phase diagram, study by calorimetry 303
Anodizing of aluminium, in sulfuric acid, thermal phenomena 263
Aprotic solvents, complexes with pyromellitic acid amide derivative, EGA 199
Aromatic polyamides, kinetic analysis of thermal degradation 107

Barium perchlorate trihydrate-chromium(III) oxide mixture, thermal behaviour 257
Benzene, specific heat determination by DTA 248
Bibliography Section 159, 323
Binary polymer systems, compatibility of 23, 31
Book review 157
Borax, thermal decomposition of 277

Cadmium hydroxynitrate, effect of crystalline structure on thermal decomposition 131
Calorimetry, for phase analysis of aluminium-zinc system 305
Cerium-iron alloys, direct injection enthalpimetric determination of 291
Chalcopyrite, thermal oxidation of 205
Chromium(III) oxide-bariumperchlorate trihydrate mixture, thermal behaviour of 257
Clioquinol, determination by enthalpimetry 139
Cobalt(II) hexacyanoferrate(II), thermal decomposition, Mössbauer spectra 9
Complexes of acid amides with aprotic solvents, EGA 199
– of dithiocarbamate derivatives, thermal behaviour 309
–, relationship between structure and kinetics of thermal decomposition 95
Conformation of dibenzotropone, adsorbed on montmorillonites 49
Copper(II) aquacomplexes, kinetics of thermal decomposition 95
Coulometric catalytic thermometric titration, of free acid in formaldehyde 285
– titration curve, of free acid in formaldehyde 287
Crystalline structure, effect on thermal decomposition of hydroxynitrates 131

Dibenzotropone, adsorbed on montmorillonites, conformation of 49
Derivative thermogravimetry, of chromium(III) oxide-barium perchlorate trihydrate mixtures 259
– –, of polyacrylates of transition metals 238
– –, of polyamides 110
– –, of polyvanadates 76
– –, of strontium tris(oxalato)oxoniobate 90
– –, of transition metal acrylates 235
– –, of wool, treated with liquid ammonia 20
Differential scanning calorimetry, of aluminium-zinc alloys 305
– – –, of cadmium hydroxynitrate 133

– – –, of complexes of silver(I) with uracil derivatives 255
– – –, for determination of heat of fusion of wool 226
– – –, of phase transition of lithium stearate 120
Differentila thermal analysis, of borax 278
– – –, of chromium(III) oxide-barium perchlorate trihydrate mixtures 259
– – –, of chalcopyrite 212
– – –, of complexes of dithiocarbamate derivatives 312
– – –, – of silver(I) with uracil derivatives 254
– – –, determination of specific heats of fluids by 248
– – –, of hydrazinium salts 193
– – –, of lead chloride 101
– – –, – – -lead oxide mixture 104
– – –, of polyacrylates of transition metals 238
– – –, of polystyrene 112
– – –, of polyvanadates 76
– – –, of strontium tris(oxalato)oxoniobate 90
– – –, of transition metal acrylates 235
– – –, of wool, treated with liquid ammonia 20
– – –, –, – tri- and tetrachloroethylene 229
Direct injection enthalpimetry of cerium-iron alloys 291
Dithiocarbamate derivatives, complexes of, thermal behaviour 309

Electronic spectra of dibenzotropone-montmorillonite adsorption complex 52
Enthalpimetry, of cerium-iron alloys 291
–, determination of Clioquinol by 139
Enthalpy of decomposition, cadmium hydroxynitrate 135
– of phase transition of lithium stearate 121
Evaporation of organic solvents, from adhesive films 66
Events 179, 185, 351
Evolved gas analysis, of complexes of acid amides with aprotic solvents 200

Formaldehyde, determination of free acid in, by thermometric titration 285
Freeman-Carroll method, modification of 315

Heat of adsorption of water vapour, on mixed hexacyanoferrates(II) 272
– of reaction, of decomposition of complexes of dithiocarbamate derivatives 313
Hexacyanoferrates(II) of Co, Ni and Zn, thermal decomposition of 7
–, mixed, zeolitic properties of 269
Hydrazinium salts, thermal decomposition of 191
Hydrogen consumption of ruthenium-magnesium oxide catalyst 84
Hydrolysis of lead chloride by residual water 104
Hydroxynitrates, effects of crystalline structure on thermal decomposition 131

Infrared spectra of dibenzotropone-montmorillonite adsorption complexes 54
– – of strontium tris(oxalato)oxoniobate 88
Inclusion compounds of perhydrotriphenylene with alcohols, TG 2
Initial temperature, relation to the sensitivity of thermal analyzer 319

Kinetic parameters, of components in inclusion compounds 4
Kinetics of decomposition, of acrylates of transition metals 241
– of non-isothermal processes, modification of a method 315
– of thermal decomposition of copper(II) aquacomplexes 95
– – degradation of polyamides 107

Lead chloride, DTA 101
Lithium stearate, DSC 120
– –, phase transition 117

Mass spectrometry, of decomposition compounds of borax 283
– – with EGA, of complexes of acid amides with aprotic solvents 200
– –, with thermal decomposition of cadmium hydroxynitrate 135
Melting termperature, of sulfonamides, by DTA 149
Modification of the Freeman-Carroll method 315
Montmorillonite, adsorption complex with dibenzotropone, effect of temperature on 49
Mössbauer spectra of metal(II) hexacyanoferrates(II) effect of heat treatment 10

Nickel(II) hexacyanoferrate(II), thermal decomposition, Mössbauer spectra 9
NMR spectroscopy of polyvanadates 78
Non-isothermal kinetics, determination of reaction order 151

Organic solvents, evaporation from adhesive films 66

Perhydrotriphenylene, inclusion compounds of, TG 1
Phase diagram, of aluminium-zinc system, study by DSC 305
– contrast microscopy, for study of compatibility of binary polymer systems 23, 31
– transition of lithium stearate 117
Polyacrylates, of transition metals, thermal decomposition 238
Polymer systems, binary, compatibility of 23, 31
Poly(methylmethacrylate), compatibility of, in binary polymer systems 23, 31
Polyvanadates, thermal reactivity and NMR spectroscopy 73
Poly(vinyl acetate), compatibility of, in binary polymer systems 23, 31
Poly(vinyl chloride), compatibility of, in binary polymer systems 23, 31
Pyromellitic acid amide derivative, complexes with aprotic solvents, EGA 199

Reaction order, determination by thermal analysis 156
Rectangular pulse curves, for thermal curve interpretation 39
Ruthenium, interaction with MgO during thermal programmed reduction 81

Sensitivity of thermal analyzer, effect on observed initial temperature 319
Silver(I), complexes with uracil derivatives, thermal behaviour 251
Specific heat of fluids, determination by DTA 245
– –, method for determination of fluids by DTA 245
Sulfonamides, thermal properties of derivatives of 145
Strontium tris(oxalato)oxoniobate, synthesis, thermal analysis 87

Tetrachloroethylene, effect of, on fine structure of wool 225
Thermal behaviour of complexes of dithiocarbamate derivatives 312
– curve interpretation by spectral resolution 39, 217
– decomposition, of derivatives of sulfonamides 145
– –, of hydrazinium salts 191
– –, pathway of, for metal(II) hexacyanoferrates(II) 14
– – of strontium tris(oxalat)oxoniobate 87
– history, effect on phase transition of lithium stearate 117
– oxidation of chalcopyrite 205
– programmed reduction of ruthenium-magnesium oxide catalyst 84
– reactivity of polyvanadates 73
– stability of wool, after treatment with liquid ammonia 21
– treatment, effect on stability of binary polymer mixtures 31
Thermodiffusive characteristics of adhesive films 65
Thermogravimetry of borax 278
–, cadmium hydroxynitrate 133
–, of chalcopyrite 212
–, of chromium(III)oxide-barium perchlorate trihydrate mixtures 259
–, of complexes of dithiocarbamate derivatives 312
–, – of silver(I) with uracil derivatives 254

– data, of derivates of sulfonamides 148
–, for determination of activation energy of copper(II) complexes 97
–, hydrazinium salts 193
–, of inclusion compounds of perhydrotriphenylene with alcohols 2
–, of polyacrylates of transition metals 238
–, of polyamides 110
–, polymer binary systems, 24
– of polyvanadates 76
–, of strontium tris(oxalato)oxoniobate 90
–, of transition metal acrylates 235
–, of wool, treated with liquid ammonia 20
Thermokinetic determination, generalized spectral resolution for 39
– –, improvement of the algorithm of the spectral resolution for 217
Thermometric titration of free acid in formaldehyde 285
Transition metal acrylates and polyacrylates, thermal decomposition 233
Thichloroethylene, effect of, on fine structure of wool 225

Uracil derivatives, complexes with silver(I), thermal behaviour 251

Vaporization of perhydrotriphenylene and inclusion compounds 1

Water, specific heat determination by DTA 248
Wool, effect of tri- and tetrachloroethylene on fine structure of 225
–, thermal properties after treatment with liquid ammonia 17

X-ray analysis, of thermal decomposition products of borax 282
– –, – – – of chalcopyrite 208
– – of wool, treated with tri- and tetrachloroethylene 226
– diffraction, of dibenzotropone-montmorillonite adsorption complexes 60
– – of strontium tris(oxalato)oxoniobate 89

Zeolitic properties of mixed hexacyanoferrates(II) 269
Zinc(II) hexacyanoferrate(II), thermal decomposition, Mössbauer spectra 9
